HABIB UNIVERSITY'S SCHOOL OF SCIENCE AND ENGINEERING PRESENTS

INFORMATION SECURITY
AND
CYBER THREATS

Speaker: Anjum Nazir

Anjum Nazir has more than 10 years of experience in Computer Systems, Networks and Information Security training & consulting. Currently, he is working as a Senior Network Security analyst in United Bank Limited (UBL), one of the largest private sector banks in Pakistan.

Abstract:

Today's world is more interconnected than ever before. Yet for all its advantaged, increased connectivity also increases risk of theft, fraud and abuse. As we become more reliant on modern communication technologies, our vulnerability to cyber-attacks increases as well. Cyber security experts thus perform an essential role in ensuring cyber security objectives by investigating a wide range of cyber-crimes, from theft and fraud to cyber-terrorism. The objective of this talk is to share current cyber security challenges and threats for an internationally-renowned organization.

Thursday, March 31st 2016, 6:00 pm to 7:15 pm
Tariq Rafi Lecture Theater, Habib University
