

Calling Computer Science Educators

The [Computer Science program](#) at [Habib University](#) invites passionate Computer Science educators to [apply for full time faculty positions](#) at all levels.

Founded in 2014, Habib University is an undergraduate liberal arts and sciences institution whose pedagogical model encompasses a holistic education aimed at creating well rounded individuals who are global citizens yet acutely aware of their own context. With a highly qualified faculty, small class sizes, and a commitment to a faculty to student ratio of 1:12, Habib University emphasizes close interaction among the faculty and the students so that the faculty may inspire their passion for learning in the students. Its vision has earned the university key international partnerships which enable opportunities for the faculty to advance their pedagogical and professional skills.

The Computer Science program at Habib University educates students in the theory, systems, and applications of Computer Science. Rapid change being the norm in Computer Science, the program believes in providing its students a strong foundation. It especially values the interplay of Computer Science with other disciplines and encourages its students and faculty to fully indulge in the liberal arts environment of Habib University. Of special interest to the program are ways in which Computer Science and its applications impact society to bring about positive, ethical change.

The Computer Science program is looking for passionate educators to further the mission of the university and the program. Candidates must have completed or must be in the final stages of a doctoral degree in a relevant discipline (**especially Theoretical Computer Science**). Due to Habib University's unique pedagogical model, the program seeks a *cultural* compatibility in potential candidates in addition to their academic qualifications. The ideal candidate possesses excellent teaching and scholarly skills, enjoys influencing the intellectual growth of their students, has a love of learning and a passion for Computer Science, is excited about undergraduate research, works well in interdisciplinary teams, and holds a view to contribute to the growth of the institution and betterment of society.

The program prioritizes gender equity in its student as well as faculty body. **Female candidates are especially encouraged** to apply. Exposure to the liberal arts education model, as a student or otherwise, is highly preferred.

Further details of the application process as well as the online application portal are accessible [online at our website](#). Please ensure a complete application package at the time of applying in order to avoid delays.
