Job Description

Position Title	Assistant Manager – Software Development
Department	Information Technology
Reporting To	Manager – Software Development
Type of Position	Full Time

POSITION DESCRIPTION

The incumbent is purely a programming/coding role and responsible to deliver across the entire application life cycle – Concept, Requirement, Design, Build, Integrate, Deploy, Test, Host and Support. Deploy new and customized web applications & solutions using primarily Microsoft.net, MS SQL Server and Reporting tools, well-versed with the integration of API's. The candidate must possess ability to work well with sense of ownership in a diverse environment with different user levels.

DUTIES AND RESPONSIBILITIES

- ✓ Develop, test, and maintain web-based applications using .NET-7, .NET Core, .NET Framework, C#, ASP.NET, MVC, and related technologies.
- ✓ Design, develop, and optimize database structures using MS SQL Server.
- ✓ Develop and integrate RESTful APIs for seamless communication between applications.
- ✓ Assist in the deployment, configuration, and troubleshooting of web applications on IIS servers.
- ✓ Enhance and maintain existing applications by identifying and fixing bugs, implementing feature updates, and optimizing performance.
- ✓ Develop interactive and responsive UI/UX using HTML5, CSS3, JavaScript, jQuery, and AJAX.
- ✓ Implement web services (SOAP, XML, JSON) to support system interoperability.
- ✓ Perform code reviews, debugging, and unit testing to ensure high-quality deliverables.
- ✓ Assist in the design and development of reports, queries, and dashboards.
- ✓ Work with Azure DevOps and Git for source control and CI/CD automation.
- ✓ Collaborate with cross-functional teams to analyze business requirements and deliver solutions.
- ✓ Maintain technical documentation, including system architecture, workflows, and development guidelines.
- ✓ Stay updated with emerging technologies and best practices in software development.
- ✓ Perform any other duties assigned by the line manager.
